360° data security

ApeosPort is equipped with both user-friendliness and security measures

Comprehensive security measures protect your important information against threats such as unauthorised access, information leakage, and data tampering.

Azure Active Directory Authentication

The ApeosPort device can integrate with Microsoft Azure Active Directory, a cloud-based identity management service. Azure Active Directory can be used for authenticating to multifunction devices and FUJIFILM Business Innovation's cloud services.

Server-less user authentication

The server-less authentication feature* makes an additional need of authentication server unnecessary. Associating user information registered to multifunction devices with the ID information of IC cards makes it possible to share the user information among all multifunction devices connected to a parent device, enabling server-less user authentication on the devices.

*: Optional.

Carefree management

Visualise usage data to reduce costs

Device Log Service* visualises the usage of multifunction devices and printers in an office by displaying usage charts in a web browser. It is also possible to display the usage data on the control panel of a multifunction device. The service requires no dedicated server and makes it possible to increase cost awareness among employees while lightening the burden on system administrators.

*: A cloud service that FUJIFILM Business Innovation offers. A subscription to the service is additionally needed.

Easy solutions to help solve problems

From toner replacement to unexpected device failures, most problems can be solved quickly without needing to wait for a customer engineer or sales representative.

Help information accessible from the control panel and mobile devices assist you to solve problems

On the control panel of a multifunction device, you can search for and find ways to fix your problems. You can also view help information on a mobile device by scanning a QR code displayed on the control panel with the mobile device.

Remote Assistance is also available to solve problems with the help of operators

If you cannot solve a problem, contact our call center as required. An operator will remotely access your multifunction device and guide you using a finger pointer or pen function on the UI panel.

End to end automated workflow

Easy preference setting for quicker operations

New ApeosPort similar to a smartphone can have shortcuts Apps for regular operations or settings. Ability to drag and drop these Apps as per individual user preference provides much needed simplicity and easiness in operations.

Custom home screen and feature list

Move an icon just by dragging/dropping while long tapping it.

You can specify the icons (apps) and their arrangement on the home screen or features and their order on lists displayed on job screens with an easy, intuitive operation. You can also hide the features you do not need.

Complete routine tasks with one touch

A desired colour, design, and name can be specified for an icon.

Your preferred features and settings can be registered to appear on the home screen as one-touch apps. Just tapping a one-touch app completes your routine task.

Fax to Company XX

Registering a recipient prevents misdirected faxes.

Scan application forms

The trouble of specifying a file format or storage destination each time is eliminated.

Support non-routine tasks with high flexibility

Settings like the N-up option and number of copies can be changed every time a preset is selected.

Saving the settings as a preset eliminates the trouble of specifying complicated settings each time. Every time the preset is selected, you can tailor the settings to the preferences at that time, which streamlines your work process.

Translate documents just like copying

The Scan Translation Service* allows you to translate paper documents while maintaining the original layout just by scanning these documents. Digital documents sent from computers via the Internet are also supported.

Note: Japanese, English, Chinese (Simplified and Traditional), Korean, Thai, Vietnamese, Indonesian, and Malay are supported.

*: A cloud service that FUJIFILM Business Innovation offers. A subscription to the service is additionally needed.

Copy an ID card on one side of a sheet

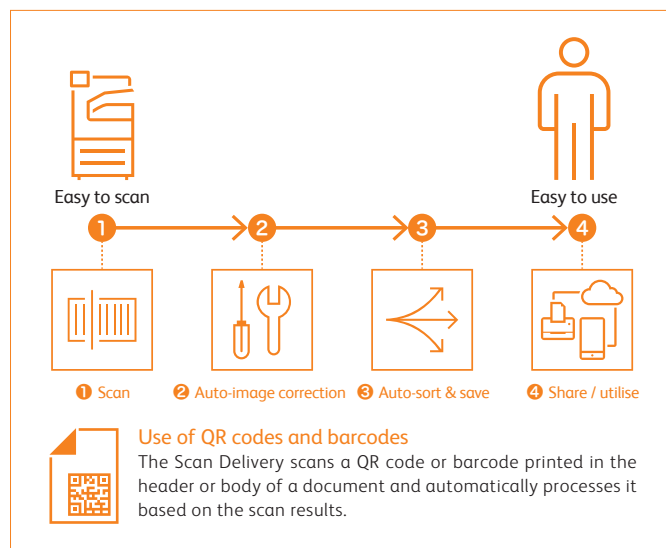

With the ID Card Copy feature, both sides of an ID card, such as a driver's licence card or health insurance card, can be printed aligned with each other on one side of a sheet. You can also enlarge the images to get a better view of them.

Automated scan processes for regular work tasks

Using the Scan Delivery* automates the process of scanning and saving documents to predefined destinations according to the rules specified for each task or document type, eliminating the need to manually specify file names or formats and perform OCR processing*. You can also extract characters from certain areas of a document and use them for the folder or file name.

*: Optional.

Automated scan processes for individual users

ScanAuto makes it possible to automatically optimise scan settings depending on the document orientation, sides to scan, etc. When the Authentication feature is used, the destination is automatically set to the authenticated user's address.

Fax settings that lead to reduced waste and higher efficiency

By configuring the Paperless Fax settings, you can store received faxes in folders so that only necessary faxes are printed after being checked on the control panel. Faxes can also be forwarded to your smartphone. With an optional kit, you can also sort them by fax number, received date, or person in charge and switch the behaviour of a multifunction device. With one touch, you can change the setting to forward incoming faxes by email, which allows you to check them from outside the office.

- Minimising paper output
- Checking incoming faxes outside the office
- Automatic sorting and forwarding
- Changing the behaviour of a multifunction device when a fax is received depending on the time of day

Borderless workspace

Your smartphone is now a control panel

Using Portable UI for Business* allows you to perform copy, fax, or scan function on new ApeosPort device directly with an iOS or Android™ smartphone. Users are simply set the job parameters on the smartphone itself and start the job just by holding the smartphone near the NFC touch area, largely reducing the wait time while queuing at the device.

Note: A wireless communication network connected to an access point is required.

*: Can be downloaded from Google Play™ or AppStore for free.

Wireless operations*¹

With wireless capability, the ApeosPort device can be installed anywhere in your office. The devices accept print or scan jobs sent from laptops or smartphones², realising more flexible working. Supported wireless printing features include Print Utility, AirPrint, and Mopria® Print Service.

Print Utility*³

This app enables a user to start a print or scan job just by holding a smartphone over the NFC touch area, saving the trouble of specifying from which multifunction device a document is to be printed or scanned.

*1: Optional.

*2: Available only when the multifunction device is connected to a Wi-Fi network.

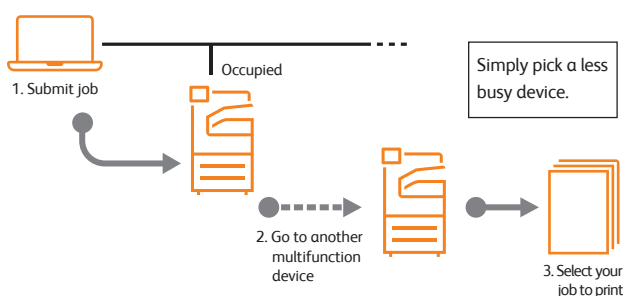

*3: Can be downloaded from Google Play™ or AppStore for free.

No need to queue up for printing

Server-less On-Demand Print* allows you to release a print job from a multifunction device other than the one specified when the job was submitted if the device is being used by another person, eliminating the need to wait for your turn.

*: Optional.

Secure, high capacity cloud storage

With Working Folder*, so long as you have an Internet connection, you can access and use documents from anywhere, anytime. Seamlessly integrating with multifunction devices, DocuWorks, and mobile devices, Working Folder allows you to make maximum use of documents. For example, it is possible to print a document stored in Working Folder from the control panel of a multifunction device or to upload scanned data with a specified name to Working Folder and send an email notification.

*: A cloud service that FUJIFILM Business Innovation offers. A subscription to the service is additionally needed.

Securely and easily printing a document even from outside the office

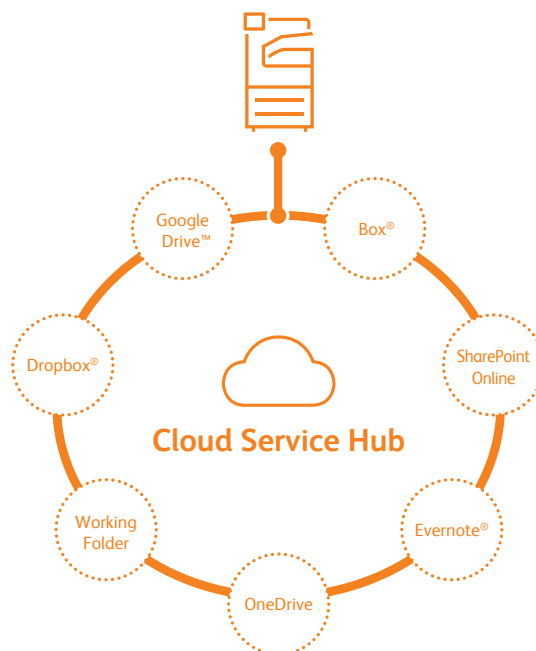

With Cloud On-Demand Print*, you can upload a document to a cloud server from a computer or mobile device and print the document from a multifunction device outside the office using an ID and password without a special printer driver. This eliminates the need to bring paper documents, preventing data loss.

*: A cloud service that FUJIFILM Business Innovation offers. A subscription to the service is additionally needed.

Centralised cloud integration

Cloud Service Hub* achieves single sign-on across cloud storage services. This enables you to save a scanned document to cloud storage directly from a multifunction device and search for a document to print across multiple cloud storage services. Text in a scanned document can be captured through OCR, which allows you to do a full-text search.

*: A cloud service that FUJIFILM Business Innovation offers. A subscription to the service is additionally needed.
